

# Suction Cup/With Non-slip Feature

Bowl Shape	ø32, ø40, ø50, ø63, ø80, ø100
Bowl Bellows Shape	ø32, ø40, ø50, ø63, ø80, ø100
Oval Flat Shape	16 x 50, 30 x 90, 40 x 80, 50 x 100

## Longer life (More than twice that of urethane cups)

Cup material: **FS61** (Fluoro-based rubber) with excellent abrasion resistance  
 Reduced number of cup replacements

### Non-slip special ribs

Diagonal ribs are radially arranged to secure the gripping force in all directions.

- Prevents workpiece slippage
- Secure adsorbing and transferring are possible.

### Bowl shape with excellent flexibility

Curved workpieces can also be adsorbed.

Horizontal holding force: 387 N (Cup diameter ø100)\*1  
 Suitable for high-temperature workpieces (200°C)\*1

\*1 For details, refer to the specifications on pages 5, 12, and 20.

### Suitable for workpieces with oil film

As oil is ejected to the grooves between special ribs, the lateral slipping of workpiece can be suppressed even on a steel plate with oil film.

**ZP3M Series**

CAT.ES100-147C

# Suction Cup/With Non-slip Feature **ZP3M Series**

## Mesh filter (Option)

## Insert-molded cup

## Mounting

① Mounting with a hexagon wrench  
(Adapter (Male thread/Female thread))

② Mounting with a standard wrench  
(Adapter (Male thread/Female thread))

③ Square adapter mounting

## Bowl bellows shape

Discharge time reduced by max. **40%**  
(horizontal transfer during adsorption)

Transfer conditions

Cup diameter: ø50, Workpiece mass: 1.3 kg,  
Supply pressure: -85 kPa, Acceleration/Deceleration: 5 [G]

ZP3M (Bowl bellows shape)

ZP3E (Bellows shape)

Relationship between the amplitude and time

Deflection **Small** Discharge time **0.18 s** Deflection **Large** Discharge time **0.30 s**

## Anti-stick grooves

Anti-stick grooves/Improved durability

The anti-stick grooves on the circumference prevent the bellows from sticking during suction. This reduces returning failure after the workpiece is released.

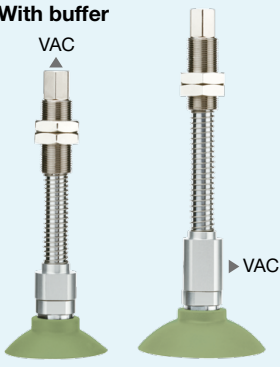

## The bowl shape can handle curved workpieces.

The cup follows the workpiece shape, making stable adsorption possible.

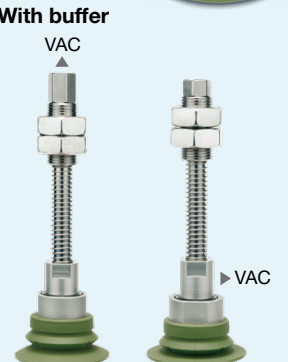

Bowl-shape skirt with flexibility

# Suction Cup/ Bowl Shape with Non-slip Feature ZP3M Series

## How to Order

### ① Vacuum inlet direction

<b>T</b>	Vertical
<b>Y</b>	Lateral

### ⑤ Buffer stroke

Stroke [mm]	Cup size	
	All sizes	
10	●	●
30	●	●
50	●	●

### ⑦ Mesh filter

<b>Nil</b>	None
<b>MF</b>	With mesh filter

### Mesh filter unit

Part no.	Cup diameter	
	ø32 to ø50	ø63 to ø100
ZPMF-60-D13	●	—
ZPMF-60-D18	—	●

### ② Cup diameter

<b>32</b>	ø32
<b>40</b>	ø40
<b>50</b>	ø50
<b>63</b>	ø63
<b>80</b>	ø80
<b>100</b>	ø100

### ③ Material

Symbol	Material	Color
<b>FS</b>	FS61 (Fluoro-based rubber)	Green

### ④ Buffer specifications

<b>JB</b>	Rotating, With bushing
<b>KB</b>	Non-rotating, With bushing

### ⑥ Connection thread and type

Mounting	Type	Symbol	Size	Cup diameter	
				ø32 to ø50	ø63 to ø100
Direct mounting	Male thread	<b>A10</b>	M10 x 1.0	●	—
		<b>A16</b>	M16 x 1.5	—	●
		<b>AG02</b>	G1/4	●	●
	Female thread	<b>B14</b>	M14 x 1.0	●	●
		<b>BG02</b>	G1/4	●	●
		<b>BG03</b>	G3/8	●	●
	Square adapter	<b>S32</b>	□31.8	●	●

\* The adapter and cup are adhered to each other and cannot be disassembled.

## Specifications

### Cup Material

Material	FS61 (Fluoro-based rubber)
Color of rubber	Green
Rubber hardness (Shore A: ±5°)	65
Operating temperature range*1	0°C to 200°C
Ambient temperature	0°C to 150°C

\*1 Surface temperature of the workpiece to be adsorbed

### Adapter Specifications

Connection Cup diameter	Male thread		Female thread	Square adapter
	ø32 to ø50	ø63 to ø100	ø32 to ø100	ø32 to ø100
Size	M10 x 1.0 G1/4	M16 x 1.5 G1/4	M14 x 1.0 G1/4 G3/8	□31.8
Vacuum inlet	Use the connection thread and type.			

### Buffer Specifications

Non-rotating specification	Cup diameter		ø32 to ø50			ø63 to ø100		
	Stroke [mm]		10	30	50	10	30	50
<b>JB</b> Rotating, With bushing	Connection thread		M18 x 1.5			M22 x 1.5		
	Spring reactive force [N]	At 0 stroke	5.0			10.0		
		At full stroke	6.5	8.5	10.5	11.5	13.5	15.5
<b>KB</b> Non-rotating, With bushing	Connection thread		M22 x 1.5			M26 x 1.5		
	Spring reactive force [N]	At 0 stroke	5.0			10.0		
		At full stroke	7.0	9.0	11.0	13.5	15.5	17.5

### Cup Specifications

Part no.	Horizontal holding force [N]*1		Minimum curvature radius for adsorption [mm]*2
	Without oil	With oil	
<b>ZP3M-T32RFS</b>	47	21	14
<b>ZP3M-T40RFS</b>	81	53	15
<b>ZP3M-T50RFS</b>	111	74	20
<b>ZP3M-T63RFS</b>	170	108	27.5
<b>ZP3M-T80RFS</b>	231	178	36
<b>ZP3M-T100RFS</b>	387	224	46

\*1 These are actual measurement values when flat workpieces were adsorbed at a setting vacuum pressure of -60 kPa; however, they are not guaranteed values. (According to SMC's tests)

The values vary depending on the conditions (shape, surface roughness, oil type, oil amount, and other conditions) of the workpiece.

\*2 These are actual measurement values when cylindrical workpieces were adsorbed at a setting vacuum pressure of -85 kPa; however, they are not guaranteed values. (According to SMC's tests)

### Mesh Filter Specifications

<b>Mesh filter</b>	60
<b>Opening</b>	250 μm

Buffer assembly part no. p. 11

<b>ZP3M-T3090WFS</b>	160	42	42
<b>ZP3M-T4080WFS</b>	174	59	46
<b>ZP3M-T50100WFS</b>	267	105	65

\*1 These are actual measurement values when flat workpieces were adsorbed at a setting vacuum pressure of -60 kPa; however, they are not guaranteed values. (According to SMC's tests)

The values vary depending on the conditions (shape, surface roughness, oil type, oil amount, and other conditions) of the workpiece.

\*2 The horizontal holding force in the breadth and length directions is the same.

\*3 These are actual measurement values when cylindrical workpieces were adsorbed at a setting vacuum pressure of -85 kPa; however, they are not guaranteed values. (According to SMC's tests)

### Mesh Filter Specifications

Mesh filter	60
Opening	250 μm

# ZP3M Series Suction Cup/Specific Product Precautions

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For vacuum equipment precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smeworld.com>

## Design

### 1. Before use, please check the transfer conditions with the customer’s actual equipment.

The transfer ability varies depending on the workpiece material, the friction between the cup and workpiece, moment, wind, vibration, etc. Testing with the customer’s actual equipment is necessary.

### 2. In cases where the workpieces are heavy or dangerous objects, etc., take measures to address a possible loss of adsorption force (installation of a drop prevention guide, etc.).

### 3. The oil, chemical, and other substances adhered to the workpiece may not be suitable for the cup material.

Before using this product, sufficiently verify the workpieces in your operating environment.

## Mounting

### 1. When mounting the product, tighten with the tightening torque shown in the table below.

If excessive or insufficient tightening torque is applied, sealing failure or loose screws may result.

When using a product equipped with a buffer, if the buffer is tightened to a torque beyond the appropriate tightening torque range, the buffer may malfunction.

#### With Adapter (Male thread type)

Model	Connection thread size	Proper tightening torque [N·m]
ZP3M-T□(R, RB, W)FS-A10-□	M10 x 1.0	8 to 10
ZP3M-T□(R, RB, W)FS-A16-□	M16 x 1.5	13 to 15
ZP3M-T□(R, RB)FS-AG02-□	G1/4	8 to 12

#### With Adapter (Female thread type)

Model	Connection thread size	Proper tightening torque [N·m]
ZP3M-T□RFS-B14-□	M14 x 1.0	11 to 13
ZP3M-T□(R, RB, W)FS-BG02-□	G1/4	8 to 12
ZP3M-T□(R, RB, W)FS-BG03-□	G3/8	15 to 20

#### Plate Mounting: With Adapter (Male thread type)

Model	Connection thread size	Proper tightening torque [N·m]
ZP3M-T□WFS-A10-B5-□	M10 x 1.5	8 to 10
ZP3M-T□WFS-A14-B01-□	M14 x 1.5	11 to 13
ZP3M-T□WFS-AG02-B01-□	G1/4	8 to 12

#### With Buffer

Model	Connection thread size	Proper tightening torque [N·m]
ZP3M-(T/Y)□(R, RB)FSJB□-□	M18 x 1.5	28 to 32
	M22 x 1.5	45 to 50
ZP3M-(T/Y)□(R, RB)FSKB□-□	M22 x 1.5	45 to 50
	M26 x 1.5	62 to 68
ZP3M-T□WFSKB□-□	M22 x 1.5	45 to 50
	M26 x 1.5	62 to 68

## Mounting

### 2. How to use the square adapter

Use the square adapter by inserting it to an attachment you prepare. If it is difficult to insert the square adapter, apply grease to the O-ring. Prepare retaining measures by yourself.

## Handling

### 1. Depending on the type of oil or foreign matter, the mesh filter may be clogged at an early stage.

Before using this product, sufficiently verify the mesh filter in your operating environment.

### 2. Periodically inspect the mesh filter.

An adsorbing malfunction may be caused by the clogging of the mesh filter.

### 3. When the suction cup is pressed, make sure it stays within the stroke range.

If this product is used with a stroke exceeding the maximum stroke, the cup may be broken or may reach the end of its service life earlier.

### 4. Suction cups are consumable. Please replace them when cracks or deformation is confirmed during periodic maintenance.

### 5. The workpiece size must be equal to or greater than the minimum curvature radius for adsorption.

If the workpiece size is smaller than the minimum curvature radius for adsorption, an adsorbing malfunction may occur.

### 6. As the adapter and cup are adhered to each other, they cannot be disassembled.

### 7. When adsorbing a plane, the cup skirt may be entrained depending on the workpiece with rough friction surface. Before using this product, sufficiently verify the adsorbing condition.

## Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)\*1), and other safety regulations.

 **Danger :** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

\*1) ISO 4414: Pneumatic fluid power - General rules and safety requirements for systems and their components  
ISO 4413: Hydraulic fluid power - General rules and safety requirements for systems and their components  
IEC 60204-1: Safety of machinery - Electrical equipment of machines - Part 1: General requirements  
ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1: Robots etc.

### Warning

#### 1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

#### 2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

#### 3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

#### 4. SMC products cannot be used beyond their specifications. They are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not allowed.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, combustion equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

### Caution

**SMC develops, designs, and manufactures products to be used for automatic control equipment, and provides them for peaceful use in manufacturing industries.**

**Use in non-manufacturing industries is not allowed.**

Products SMC manufactures and sells cannot be used for the purpose of transactions or certification specified in the Measurement Act of each country. The new Measurement Act prohibits use of any unit other than SI units in Japan.

### Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

#### Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.\*2)  
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.  
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

\*2) **Suction cups (Vacuum pads) are excluded from this 1 year warranty.**

A suction cup (vacuum pad) is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the suction cup (vacuum pad) or failure due to the deterioration of rubber material are not allowed by the limited warranty.

#### Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

#### Revision History

**Edition B** \* A bowl bellows shape (ø50, ø63, and ø80) has been added.  
\* The number of pages has been increased from 12 to 20.

**Edition C** \* An oval flat shape (16 x 50, 30 x 90, 40 x 80, and 50 x 100) has been added.  
\* The number of pages has been increased from 20 to 28.

 **Safety Instructions** Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.
