

Air Cylinder

ø32, ø40, **ø45**, ø50, **ø56**, ø63, **ø67**, ø80, **ø85**, ø100 RoHS

Intermediary Bore Sizes

- Air saving
- Space saving

New A both ends tapped mounting option has been added.

The overall length has been shortened by reducing the amount of tie-rod protrusion from the body end surface.

Overall length shortened

Max. Weight 36% lighter 1.56 kg → 1.00 kg
 (Compared with the existing MB series model, ø50, 100 mm stroke)

JMB Series

Air saving Reduced by up to 29%

Air consumption can be reduced by optimal size selection.

Bore size [mm]	ø40	ø45	ø50	ø56	ø63	ø67	ø80	ø85	ø100
Air consumption L (ANR)	1.4	1.8	2.2	2.8	3.6	4.1	5.8	6.6	9.1

Conditions/Supply pressure: 0.5 MPa
Load factor: 50%, At 100 mm stroke

Example

In order to move a workpiece with a weight of 37 kg, a bore size of ø43 or more is required. Previously, a ø50 bore size would have been the closest option since the next smallest size, the ø40, has insufficient output. However, with the **newly released bore size of ø45**, sufficient output can be obtained while also saving air due to a 0.4 L (ANR) reduction in air consumption compared with the ø50.

* Conditions/Supply pressure: 0.5 MPa, Load factor: 50%

Current bore size output

Bore size [mm]	Output*1 [kg]	Air consumption [L (ANR)]	Judgment when 37 kg of output is required
ø40	32.0	1.4	Not acceptable
ø50	50.1	2.2	Acceptable

*1 Supply pressure: 0.5 MPa, Load factor: 50%

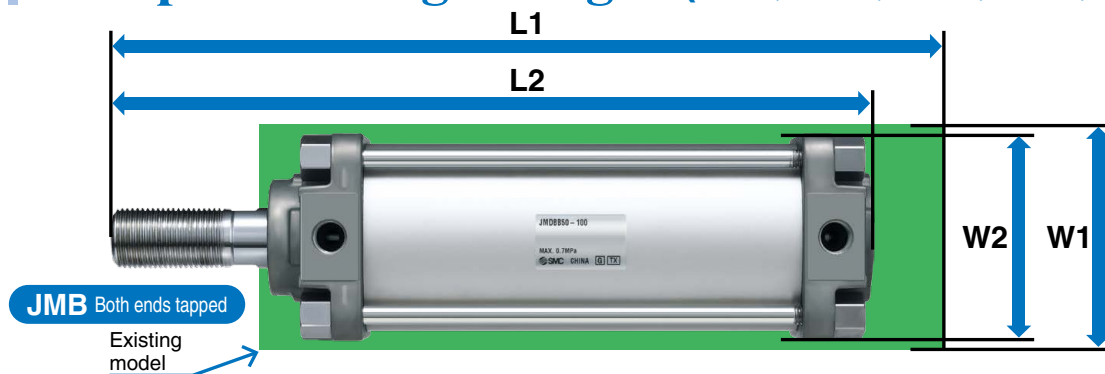

When the intermediary bore size of ø45 is used

Bore size [mm]	Output*1 [kg]	Air consumption [L (ANR)]	Judgment when 37 kg of output is required
ø45	40.6	1.8	Acceptable

*1 Supply pressure: 0.5 MPa, Load factor: 50%

Air consumption ø50: 2.2 L (ANR) – ø45: 1.8 L (ANR) = 0.4 L (ANR) 18% reduction

Compact and lightweight (ø32, ø40, ø50, ø63, ø80, ø100)

(Compared with the existing MB series model)

Bore size [mm]	W: Width		L: Overall length		Weight	
	Existing model W1 [mm]	JMB/Both ends tapped W2 [mm]	Existing model L1 [mm]	JMB/Both ends tapped L2 [mm]	Existing model [kg]	JMB/Both ends tapped [kg]
ø32	46	42	235	204	0.66	0.43
ø40	52	48	239	209	0.91	0.64
ø45		52		209		0.68
ø50	65	60	256	221	1.56	1.00
ø56		65		221		1.09
ø63	75	70	256	227	1.83	1.28
ø67		75		227		1.51
ø80	95	88	290	248	3.25	2.18
ø85		95		248		2.67
ø100	114	110	290	257	4.48	3.48

* Compared with the both ends tapped type at a 100 mm stroke

Reduces labor time

- Air cushion adjustment is not required due to the non-adjustable air cushion.
- The built-in rubber bumper reduces the metal noise that occurs when the piston stops.

Lightweight and compact

Weight comparison between cylinders with a bracket

Flange

Weight: Max. **49%** reduction Weight comparison (When mounted on the cylinder, 100 mm stroke) [kg]

Bore size [mm]	MB	JMB	Weight difference	Reduction rate [%]
ø32	0.95	0.49	0.46	49
ø40	1.28	0.71	0.57	45
ø50	2.01	1.11	0.9	45
ø63	2.62	1.49	1.13	43
ø80	4.7	2.53	2.17	46
ø100	7.79	4.08	3.71	48

Width: Max. **20%** reduction, Height: **16%** reduction Dimension comparison (When mounted on the cylinder) [mm]

Bore size	Width				Height			
	MB: FZ1	JMB: FZ2	Reduction	Reduction rate [%]	MB: FB1	JMB: FB2	Reduction	Reduction rate [%]
ø32	79	65	14	18	50	42	8	16

ø80	3.75	2.7	1.05	28
ø100	5.14	4.21	0.93	18

Height: **11%** reduction Dimension comparison (When mounted on the cylinder) [mm]

Bore size	Height			
	MB: LY1	JMB: LY2	Reduction	Reduction rate [%]
ø32	53	47	6	11
ø40	59	53	6	10
ø50	72.5	66	6.5	9
ø63	82.5	77	5.5	7
ø80	102.5	98	4.5	4
ø100	122	121	1	1

Part numbers for products with a rod end bracket are available.

Example) **JMDBB40-50-V-M9BW**

It is not necessary to order a bracket for the applicable cylinder separately.

- * The rod end bracket is shipped together with the product but does not come assembled.
- * Rod end brackets are the same as those for the MB series.

Rod end bracket

Nil	Without bracket
V	Single knuckle joint
W	Double knuckle joint

With rod end bracket

- V: Single knuckle joint
- W: Double knuckle joint

How to Order

With auto switch **JMDB B 32** **50** **M9BW**

With auto switch (Built-in magnet)
* Not available without a magnet

Mounting

B	Basic
A	Both ends tapped*1
L	Axial foot bracket
F	Rod flange
G	Head flange

* "L," "F," and "G" cannot be selected for bore sizes ø45, ø56, ø67, and ø85.
*1 In order to mount a foot bracket or flange on the both ends tapped type, it must be ordered separately. Refer to "Mounting Brackets/Part Nos." on page 5 for order numbers.

Number of auto switches

Nil	2
S	1
3	3
n	n

Auto switch

Nil	Without auto switch
------------	---------------------

* For applicable auto switches, refer to the table below.

Rod end bracket

Nil	Without bracket
V	Single knuckle joint
W	Double knuckle joint

* A knuckle joint pin is not provided with the single knuckle joint.
* The rod end bracket is shipped together with the product.

Cylinder stroke [mm]
Refer to page 4 for standard strokes.

Port thread type

Nil	Rc
TN	NPT
TF	G

Bore size

32	32 mm
40	40 mm
45	45 mm
50	50 mm

Double knuckle joint	1	Y-03M	Y-04M	Y-05M			Y-08M			Y-10M	1 double knuckle joint, 1 pin, 2 split pins, and 2 flat washers	

*1 Order two foot brackets per cylinder.

*2 An "A" is suffixed to the end of the part numbers of foot brackets and flanges to be mounted on the both ends tapped type.

Ordering example) Bore size $\phi 32$: Foot bracket JMB-L032A Included parts: 1 foot bracket and 2 hexagon socket head cap screws
 : Flange JMB-F032A Included parts: 1 flange and 4 hexagon socket head cap screws

Mounting Brackets/Material, Surface Treatment

Segment	Description	Material	Surface treatment
Mounting brackets	Foot bracket	Carbon steel	Zinc chromating
	Flange	Carbon steel	Zinc chromating
Accessories	Single knuckle joint	Free cutting carbon steel	Zinc chromating
	Double knuckle joint	Cast iron	Metallic silver color painting
	Knuckle joint pin	Carbon steel	(None)

Weight

Bore size [mm]		32	40	45	50	56	63	67	80	85	100
Basic weight	Basic	0.21	0.30	0.32	0.62	0.69	0.88	1.03	1.54	1.91	2.56
Additional weight per 50 mm of stroke		0.11	0.17	0.18	0.19	0.20	0.20	0.24	0.32	0.38	0.46
Additional weight for mounting bracket	Foot bracket	0.04	0.05	—	0.08	—	0.14	—	0.26	—	0.36
	Flange	0.06	0.07	—	0.11	—	0.21	—	0.35	—	0.60
Accessories	Single knuckle joint	0.15	0.23	0.23	0.26	0.26	0.26	0.26	0.60	0.60	0.83
	Double knuckle joint (with pin)	0.22	0.37	0.37	0.43	0.43	0.43	0.43	0.87	0.87	1.27

Calculation example) **JMDBL50-100**

- Basic weight 0.62 (Basic, $\phi 50$)
- Additional weight 0.19/50 mm stroke
- Stroke 100 mm stroke
- Foot bracket (2 pcs.) 0.08 x 2

$$0.62 + (0.19 \times 100/50) + (0.08 \times 2) = 1.16 \text{ kg}$$

Allowable Kinetic Energy

Example) Load limit at the rod end when a $\phi 50$ air cylinder is actuated at 300 mm/s
 Extend upward from 300 mm/s on the horizontal axis of the graph to the intersection point with the line for a 50 mm bore size, and then extend leftward from this point to find the load of 40 kg.

Allowable Lateral Load at Rod End

[Stainless Steel Mounting Screw Kit]

The following stainless steel mounting screw kit (including set screws) is available. Use it in accordance with the operating environment. (Since the auto switch mounting bracket is not included, order it separately.)

* When using the D-M9□A(V), do not use the steel set screws which are included with the auto switch mounting brackets shown to the left (BMB10-032, BMB5-032, BA7-040, BA7-063). Order a stainless steel screw kit (BBA1) separately, and use the M4 x 6 L stainless steel set screws included in the BBA1.

Prior to Use

Auto Switch Connections and Examples

Sink Input Specifications

3-wire, NPN

2-wire

Source Input Specifications

3-wire, PNP

2-wire

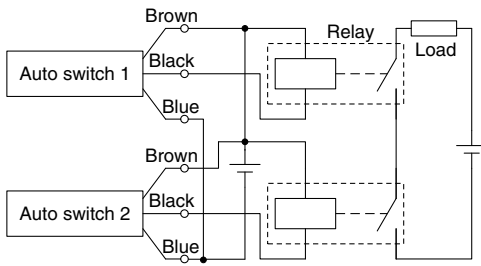

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

Examples of AND (Series) and OR (Parallel) Connections

* When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid. Depending on the operating environment, the product may not operate properly.

3-wire AND connection for NPN output (Using relays)

(Performed with auto switches only)

3-wire OR connection for NPN output

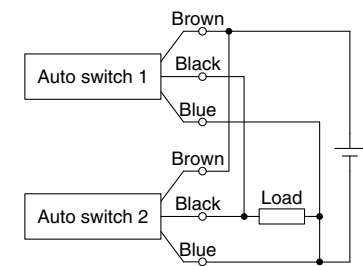

3-wire AND connection for PNP output (Using relays)

(Performed with auto switches only)

3-wire OR connection for PNP output

2-wire AND connection

When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state. The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with a load voltage less than 20 V cannot be used. Please contact SMC if using AND connection for a heat-resistant solid state auto switch or a trimmer switch.

Example) Load voltage at ON
 Power supply voltage: 24 VDC
 Internal voltage drop: 4 V
 Load voltage at ON = Power supply voltage –
 Internal voltage drop x 2 pcs.
 = 24 V – 4 V x 2 pcs.
 = 16 V

2-wire OR connection

(Solid state)
 When two auto switches are connected in parallel, malfunction may occur because the load voltage will increase when in the OFF state.

(Reed)
 Because there is no current leakage, the load voltage will not increase when turned OFF. However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

Example) Load voltage at OFF
 Leakage current: 1 mA
 Load impedance: 3 kΩ
 Load voltage at OFF = Leakage current x 2 pcs. x
 Load impedance
 = 1 mA x 2 pcs. x 3 kΩ
 = 6 V

JMB Series

Specific Product Precautions

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For actuator and auto switch precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

Mounting

Caution

1. Allowable lateral load

Lateral load that can apply to the piston rod end is limited. If a cylinder is used with a lateral load over the limit, it may cause air leakage due to abnormal friction of seals, galling of cylinder tubes and pistons, or abnormal friction of the bearing part. The lateral load applied to the piston rod must be within the allowable range indicated in this catalog. When the load exceeds the limit, install a guide or change the bore size to suit the load in order to make the load within the allowable range.

2. Connection with a workpiece

When a workpiece is mounted on the piston rod end, connect them aligning the center of piston rod and a workpiece. If they are off-center, lateral load is generated and phenomena mentioned in 1. may occur. In order not to apply the off-center load, use of a floating joint is recommended.

3. Use the tightening torques shown below when replacing mounting brackets.

Bore size [mm]	Tightening torque [N·m]
32, 40	1.79 to 2.42
50, 63	3.09 to 4.19
80	6.38 to 8.63
100	12.5 to 16.91

4. When replacing the mounting bracket, the tie-rod on the cylinder body may also loosen.

After retightening the tie-rod tightening nut with the proper tightening torque (refer to 3. above), install the mounting bracket.

5. Simultaneous use of multiple cylinders

It is difficult to control the speed of pneumatic cylinders. The following conditions cause speed change: change in supply pressure, load, temperature and lubrication, performance difference of each cylinder, deterioration of each part over time, etc. Speed controller can be used to control the speed of multiple cylinders simultaneously for a short period of time, but depending on conditions, it may not work as desired. If multiple cylinders cannot operate simultaneously, unreasonable force is applied to the piston rod because cylinder positions may not be the same. This may cause abnormal friction of seals and bearings, and galling of cylinder tubes and pistons. Do not use an application to operate several cylinders simultaneously by adjusting cylinder speed. If this is inevitable, use a high rigid guide against load, so that the cylinder is not damaged even when the each cylinder output is slightly different.

6. Depending on the system configuration selected, the specified speed may not be satisfied.

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Danger :** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

*1) ISO 4414: Pneumatic fluid power – General rules relating to systems.
ISO 4413: Hydraulic fluid power – General rules relating to systems.
IEC 60204-1: Safety of machinery – Electrical equipment of machines.
(Part 1: General requirements)
ISO 10218-1: Manipulating industrial robots – Safety.
etc.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.
If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.
Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Revision History

Edition B	* The “Allowable Lateral Load at Rod End” graph has been changed.	TQ
Edition C	* Bore sizes ø63, ø67, ø80, ø85, and ø100 have been added.	TR
Edition D	* Port thread types NPT and G have been added.	UR
Edition E	* An axial foot bracket type and a flange type have been added to mounting brackets. * Number of pages has been increased from 12 to 16.	ZT
Edition F	* A both ends tapped mounting option has been added.	AW

 **Safety Instructions** Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.
